About these Release Notes

This document provides the System Requirements as well as the latest information about new features, enhancements to existing features, resolved issues and known issues.

Online content from this document is available in the following knowledge base articles:

- Release Notes: Windows and Outlook 7.x:
<https://www.colligo.com/support/colligo-engage-7/release-notes>
- System Requirements: Outlook 7.x:
<https://www.colligo.com/support/colligo-engage-7/requirements-outlook>
- System Requirements: Windows 7.x:
<https://www.colligo.com/support/colligo-engage-7/requirements-windows>

Additional documentation is available on the Colligo Support website at <https://www.colligo.com/support/documentation>.

For sales related questions, please contact Colligo Sales at <https://www.colligo.com/contact-sales>.

Audience

This guide is intended for use by administrators and users of Colligo Engage 7 (Colligo Briefcase for Windows and Colligo Email Manager for Outlook).

Terminology

Colligo Engage 7 applications were called the Colligo Engage Outlook App and the Colligo Engage Windows App from release 7.0 to release 7.1 Update 6. For these releases, the applications are referred to as Colligo Engage, Engage Outlook App, and Engage Windows App, as appropriate.

Subsequent releases are referred to as Colligo Engage, Colligo Briefcase, or Colligo Email Manager, as appropriate.

Colligo Technical Support

If you have a problem with your Colligo software, following are the available support options:

1. Colligo Knowledge Base: <https://www.colligo.com/support/knowledgebase>.
2. Colligo Support Community: <https://www.colligo.com/support/community>.
This community is free and open to anyone.
3. Colligo Online Support: <https://www.colligo.com/support/request>.

Submit a ticket online if you have current M&S or an active subscription.

System Requirements

Client Hardware Requirements

Colligo Engage 7 has the same client system requirements as Microsoft Office:

- Office 2010: [https://technet.microsoft.com/en-us/library/ee624351\(v=office.14\).aspx](https://technet.microsoft.com/en-us/library/ee624351(v=office.14).aspx)
- Office 2013: <https://technet.microsoft.com/en-us/library/ee624351.aspx#Overview>
- Office 2016:
<https://products.office.com/en-us/office-system-requirements#Office2016-suites-section>

Client Operating System

Colligo Engage 7 runs on x64 and x86 versions of Windows 7, Windows 8, 8.1, and Windows 10.

Client Software Requirements: Windows and Outlook

Colligo Engage 7 has the following client software requirements:

- Microsoft Office 2010 SP1 or higher, 2013, or 2016
 - Note:** Colligo Email Manager is not supported in **Coming Soon** mode.
 - Both 32-bit and 64-bit versions of Microsoft Office are supported.
 - If your organization implements a policy to prevent users from creating or modifying PSTs, and you are using the 64-bit version of Office, functionality will be reduced. For details, refer to the knowledge base article **Colligo Email Manager with 64-bit Outlook** (<https://support.colligo.com/solution/articles/16000009585>).
- Microsoft Office PIAs (if using Office 2010)
<https://www.microsoft.com/download/en/details.aspx?id=3508>
- Microsoft .NET Framework 4.5.2 Runtime
<https://www.microsoft.com/en-ca/download/details.aspx?id=42642>
- Windows Identity Foundation (required for single sign on authentication through ADFS 2.0)
<https://www.microsoft.com/en-ca/download/details.aspx?id=17331>
- Microsoft Visual C++ 2013 Redistributable Package
<https://www.microsoft.com/en-ca/download/details.aspx?id=40784>
 - 32-bit operating systems need only the x86 version
 - 64-bit operating systems need both the x86 and the x64 version
- Internet Explorer (IE) 9 or higher (optional)

Additional Client Software Requirements: Outlook

Colligo Email Manager has an additional client software requirement:

- Visual Studio Tools for Office (VSTO) 2010

<https://www.microsoft.com/en-ca/download/details.aspx?id=48217>

Server Requirements

The following versions of Windows are supported:

- Windows 2008R2 Server (for Terminal Services) or higher

Colligo Engage 7 supports connectivity to the following editions of SharePoint:

- SharePoint 2010, 2013, SharePoint Online (Office 365)
- (Optional) Microsoft FAST Search Server 2010 for SharePoint

For compatibility questions regarding Cumulative Updates and Service Packs for SharePoint, please contact Colligo Support at <https://colligo.com/request>.

Release 7.3.0 Update 1 – 26 May 2019

New in this Release: Colligo Engage 7.3.0 Update 1 (build 7.3.0.117)	
Reference	Description
CON-1044	Resolved an issue with the Authentication window not being drawn correctly.

Release 7.3.0 – 09 November 2018

The **System Requirements** have been updated to add that Colligo Email Manager is not supported in **Coming Soon** mode.

New in this Release: Colligo Engage 7.3.0 (build 7.3.0.0)	
Reference	Description
BB-8	Support for Office 365 sites in the Connect to Outlook App feature in Internet Explorer. For details, refer to the knowledge base article Always Allow Office 365 (https://support.colligo.com/a/solutions/articles/16000013943).
BB-145	All features of Colligo Email Manager can now be used when TLS 1.2 is the only protocol permitted. When communicating with SharePoint, this protocol is now the default when available.

Release 7.2.3 – 05 June 2018

This release includes a change to the System Requirements. As of this release, the Microsoft .NET Framework 4.5.2 Runtime is required.

New in this Release: Colligo Engage 7.2.3 (build 7.2.3.0)	
Reference	Description
BB-6	New option to automatically rename duplicates on upload when in Connected Mode . When this option is enabled, any naming conflicts will be resolved as if the user had selected Rename from the options pop-up. The renamed file will have ' - #' appended to the file name.

New in this Release: Colligo Engage 7.2.3 (build 7.2.3.0)	
Reference	Description
	To enable this feature, use the configuration setting Automatically Rename Duplicates (https://support.colligo.com/solution/articles/16000080728).
BB-13 BB-37	Behavior change: The Send & File feature now files an email only after it has been successfully sent.
BB-110	The Metadata Editor HTML text limit has been increased to match the Microsoft definition for this type.
BB-118	Performance improvements to reduce the possibility of Microsoft throttling the connection to SharePoint.
BB-125	Colligo Briefcase Offline Search now has an option to allow users to search with an exact word match. This feature does not affect content searching which was introduced in version 7.2.2 (reference CON-952). To specify default search behavior, use the configuration setting Exact Word Match (https://support.colligo.com/solution/articles/16000080729).
BB-126	Colligo Briefcase can now be installed without meeting the Microsoft Office software system requirements. To enable this feature, use the configuration setting Disable Office Prerequisite (https://support.colligo.com/solution/articles/16000080730).

Resolved Issues: Colligo Engage 7.2.3 (build 7.2.3.0)	
Reference	Description
BB-2	Colligo Email Manager was not detecting a PST created using UNC pathing. Resolved: UNC paths for PST files are now recognized. Note: Microsoft does not recommend using UNC paths for PST files.
BB-7	Resolved an issue with drag and drop filing emails in which some would remain checked out and need to be manually checked in so other people could see them.
BB-12	Users running Colligo on Windows 10 no longer see an unresponsive choice selection popup when editing metadata for a new file upload.
BB-14	At high DPI settings, some windows and dialogs were distorted, resulting in some components being unavailable. Resolved: The application now supports up to 400% DPI.

Resolved Issues: Colligo Engage 7.2.3 (build 7.2.3.0)	
Reference	Description
BB-15	Colligo Email Manager was ignoring Document Sets and Folders that were pushed from Colligo Console. This has been resolved.
BB-19	Resolved an issue in which Outlook with Colligo installed would display a timestamp of Tomorrow . This issue affected users east of the UTC and west of the International Date Line.
BB-20	Users were unable to add sites if registry entries for ADFS servers were not valid. Resolved: Malformed and incomplete entries are now ignored.
BB-112	Text in a Rich Text field of the Metadata Editor was displaying with an incorrect (larger) text size.
BB-114	Installation fails on the Microsoft Visual C++ 2013 Redistributable Package if a newer version is already installed.
BB-127	Colligo Briefcase would sometimes stop working when using copy /paste or Drag and Drop.

Release 7.2.2 – 21 March 2017

This release has many enhancements to the Colligo Briefcase Offline Search including the option to search content and the ability to hide duplicates. This feature is documented in the knowledge base article [How do I use Offline Search?](https://support.colligo.com/solution/articles/16000039615) (<https://support.colligo.com/solution/articles/16000039615>).

New in this Release: Colligo Engage 7.2.2 (build 7.2.2.0)	
Reference	Description
CON-950	Colligo Briefcase Offline Search can now search on content as well as metadata. Content search is possible because offline content downloaded by Colligo Briefcase is now indexed by the Windows search indexer. Content search is used by the features described in CON-951, 952, 953, and 954.
CON-952	Colligo Briefcase Offline Search now has an option to allow users to toggle content search on or off. When off, only metadata will be searched. To specify default search behavior, use the configuration setting Enable Content Search (https://support.colligo.com/solution/articles/16000054377).

New in this Release: Colligo Engage 7.2.2 (build 7.2.2.0)	
Reference	Description
CON-951 CON-953	<p>When Colligo Briefcase Offline Search is used to search on both metadata and content, the default display order for search results is to list items that match metadata before items that match content. Users can change the sort order by clicking on the headers. Files that match both metadata and content are only listed once, with all search results color coded as noted below:</p> <ul style="list-style-type: none"> • Files that match on metadata: black • Files that match on metadata and content: dark brown • Files that match on content only: light brown <p>To configure this feature, use the configuration setting Enable Color Coding (https://support.colligo.com/solution/articles/16000054378).</p>
CON-954	<p>Colligo Briefcase Offline Search can be configured to hide duplicates from the results list.</p> <p>Note: Duplicates are hidden based on the filename only. The filename does not include the path leading to the file. If two files are both called contract.pdf in the offline content, only one file will be displayed in the results list. As such, this feature should only be used when offline content is guaranteed to be identical for identically named files.</p> <p>To enable this feature, use the configuration setting Hide Duplicates Config (https://support.colligo.com/solution/articles/16000054379). Once enabled, this feature will be displayed in the user interface.</p> <p>To specify the default behavior of this feature, use the configuration setting Show Duplicates (https://support.colligo.com/solution/articles/16000054380).</p>
CON-964	<p>Users will now see a progress indicator when version history is being retrieved.</p>
CON-980	<p>Improved handling of the List View Lookup Threshold (LVLT).</p> <p>To allow Colligo Briefcase to remember (until the application restarts) that the LVLT has been reached in CFS, use the configuration setting Remember Lookup Threshold (https://support.colligo.com/solution/articles/16000054381).</p> <p>To adjust the starting point for breaking apart requests when the LVLT has been reached in CFS, use the configuration setting Maximum Lookup Threshold (https://support.colligo.com/solution/articles/16000054381).</p>

Resolved Issues: Colligo Engage 7.2.2 (build 7.2.2.0)	
Reference	Description
CON-940	Non-English installations would not display locations in the *.pst. This issue was caused by the resolution for CON-927. Additionally, the issue described in CON-927 now includes non-English installations.
CON-956	Resolved an issue that prevented Document Sets from appearing when they were not already cached.
CON-963	The Recreate Navigation Hierarchy configuration setting now has an MSI property. For details, refer to the knowledge base article Recreate Navigation Hierarchy (https://support.colligo.com/solution/articles/16000045604).
CON-977	Colligo Briefcase Offline Search results are now sortable by file type.
CON-979	Support for single item drag and drop of attachments when editing a list item from a custom list.

Release 7.2 Update 1 – 14 December 2016

New in this Release: Colligo Engage 7.2 Update 1 (build 7.2.1.16)	
Reference	Description
CON -912	The application will now actively synchronize an open file when it is saved even if it is locked by Microsoft office.

Resolved Issues: Colligo Engage 7.2 Update 1 (build 7.2.1.16)	
Reference	Description
CON-675	The first time you open Attachment Manager it loads the list of Favorites as displayed in the PST. If a user renames a Favorite in the PST, subsequent launches of the Attachment Manager will not display the new name until Outlook has been restarted. (Known Issue in 7.1 Update 3.)
CON-684	Users are now able to add a Favorite from Console when the path contains %20.
CON-855	Edit Properties will now appear properly in Colligo Briefcase even if the Metadata prompt has been disabled for Colligo Email Manager.

Resolved Issues: Colligo Engage 7.2 Update 1 (build 7.2.1.16)	
Reference	Description
CON-910	High CPU usage caused by Windows Explorer navigation refreshing too frequently to determine the synchronization status of locations.
CON-911	Users are now warned that check-in, check-out, and discard check-out may cause synchronization inconsistencies (including data loss) when performed on files currently open by Office.
CON-913	Improved error handling when checking version history on files.
CON-918	The Configure Synchronization popup has a scaling issue when DPI settings are set to something other than 100%.
CON-927	Moving (not copying) an email message to SharePoint by using the Outlook ribbon or by right-click no longer leaves a copy of the email in the Deleted Items folder.
CON-931	Creating shortcuts to files without an extension caused Colligo Briefcase to crash.
CON-935	Site build out in the PST can take a long time. To prevent the build out from occurring upon application startup, use the configuration setting Recreate Navigation Hierarchy (https://support.colligo.com/solution/articles/16000045604).
CON-937	Administrators now have the option to suppress JavaScript errors in the Web Browser view within Colligo Email Manager. To configure this feature, use the configuration setting Online View Hide Script Errors (https://support.colligo.com/solution/articles/16000047262).
CON-941	Icons for some file types were not being displayed in the Colligo Briefcase Offline Search results.
CON-944	The Configure button on the Synchronize Site popup is distorted at 200 DPI.
CON-945	Users were unable to add a subsite from Office 365.

Known Issues: Colligo Engage 7.2 Update 1 (build 7.2.1.16)

Reference	Description
CON-961	IE Site Connect does not work for SharePoint Online or SharePoint 2013. Workaround: Copy the URL and add the site from within the app.

Release 7.2 – 19 September 2016

Installation

If you are using Colligo Email Manager 7.x with Colligo Console, additional steps are required when upgrading. For details, refer to the knowledge base article **Upgrading to Colligo Engage 7.2** (<https://support.colligo.com/solution/articles/16000039596>).

New in this Release: Colligo Engage 7.2 (build 7.2.0.22)

Reference	Description
CON-848 CON-849	Support for web authentication to Colligo Console in Colligo Email Manager and Colligo Briefcase.
CON-869	Colligo Briefcase Offline Search: simple search (by filename) of the local cache. This feature is documented in the knowledge base article How do I use Offline Search? (https://support.colligo.com/solution/articles/16000039615).

Resolved Issues: Colligo Engage 7.2 (build 7.2.0.22)

Reference	Description
CON-766	When the Metadata prompt has been disabled globally by an Administrator, end users will no longer see the option to disable/enable metadata in Colligo Email Manager.
CON-822	RMS files will no longer cause errors during synchronization. Note: This issue will not be resolved until the SharePoint site containing RMS files is removed from Colligo's configuration. The site needs to be re-added and re-synchronized fully for the fix to take effect.
CON-837	Filtered synchronization now works for folders that exceed the List View Threshold (LVT).
CON-844	Reduced load time for synchronization filtering options in Colligo Briefcase.
CON-845	If a user is using environment variables in the StorageRoot registry value or the STORAGE_ROOT MSI property and they are configured to use Colligo Console, they will not receive a Console login prompt. (Known Issue in 7.1 Update 6.)
CON-857	Resolved an issue with erroneous detection of duplicate sites. Duplicate site detection is now based on site URLs.

Resolved Issues: Colligo Engage 7.2 (build 7.2.0.22)

Reference	Description
CON-880	When using the Attachment Manager in Colligo Email Manager (Connected Mode), folders will be displayed when the user clicks the + or > beside the node, or when the user double-clicks the folder. (Double-clicking the folder was not working).
CON-883	Improved keyboard navigation when editing managed metadata.

Known Issues: Colligo Engage 7.2 (build 7.2.0.22)

Reference	Description
CON-908	When a user restarts their system and both Colligo Briefcase and Colligo Email Manager (Offline Mode) are launched simultaneously, the user may receive two authentication dialogs. Logging into one will not close the other. The second one will need to be closed before synchronization will occur.

Release 7.1 Update 6 – 29 April 2016

Resolved Issues: Colligo Engage 7.1 Update 6 (build 7.1.27)

Reference	Description
CON-724	Using environment variables in the StorageRoot registry value or the STORAGE_ROOT MSI property can cause Outlook to crash.
CON-726	Users can now delete directly from Recovered Items.
CON-744	When uploading emails in bulk, changes to the content type for any email may result in metadata loss when the items arrive in SharePoint. Users may also see an Action Failed message.
CON-793	When a SharePoint field has a name identical to Colligo's email mapping properties, the SharePoint defaults would be overwritten. Colligo will now only apply its defaults if the field is of type text , number , or boolean . Any other situations which have identical names will map the SharePoint default instead.
CON-835	When an encrypted email is sent from a Mac or iOS device, the application would fail to successfully decrypt it and upload it to SharePoint.

Known Issues: Colligo Engage 7.1 Update 6 (build 7.1.27)

Reference	Description
CON-845 *	If a user is using environment variables in the StorageRoot registry value or the STORAGE_ROOT MSI property and they are configured to use Colligo Console, they will not receive a Console login prompt.

* This issue has been resolved in a later release.

Release 7.1 Update 5 – 21 March 2016

New in this Release: Colligo Engage 7.1 Update 5 (build 7.1.25)

Reference	Description
CON-828	MSI property value to specify the maximum size of an encrypted item. Related to the decryption feature (CON-665) added in 7.1 Update 4. For details, refer to the knowledge base article Encrypted Item Size Limit (https://support.colligo.com/solution/articles/16000009597).

Resolved Issues: Colligo Engage 7.1 Update 5 (build 7.1.25)

Reference	Description
CON-502	Editing metadata from the Windows Explorer integration may cause a crash if the location in SharePoint contains Rich Text fields.
CON-720	Many dialogs are distorted when DPI settings are set to something other than 100%. Resolved: The application now supports up to 200% DPI. If you require the use of higher DPI scale settings, please contact Colligo Support at https://colligo.com/request .
CON-760	If a user has permissions for a sub-site but not for the parent site, the user will not be able to connect to the sub-site from within the app.
CON-792	When in the Metadata editor, not all characters are visible for choice values in a Choice Checkbox column.
CON-805	When a sub-site is pushed as a folder from Colligo Console, duplicate folders may appear in the tree.

Release 7.1 Update 4 – 16 February 2016

New in this Release: Colligo Engage 7.1 Update 4 (build 7.1.23)

Reference	Description
CON-741	Support for Office 2016.
CON-665	<p>Encrypted Emails will be decrypted prior to being uploaded to SharePoint.</p> <p>For details, refer to the knowledge base article Decryption of Encrypted Emails (https://support.colligo.com/solution/articles/16000009596).</p> <p>Note: This feature is only supported in Connected Mode. Additionally, encrypted items within an encrypted email will not be decrypted.</p>

Resolved Issues: Colligo Engage 7.1 Update 4 (build 7.1.23)

Reference	Description
CON-244	In Offline Mode, when a user drags and drops multiple files which have collisions, only the first collision is detected. Subsequent collisions aren't detected properly, resulting in a user being prompted to resolve sync duplication conflicts.
CON-782	<p>When the Engage Outlook App is installed, the time to switch between folders in the user's mailbox takes a long time.</p> <p>Resolved: The application has been optimized to reduce folder switching time.</p>
CON-785	When a user of version 5 adds a root site collection (eg. http://mysite) using IE Site Connect and then adds a child subsite (eg. http://mysite/mysubsite) using IE Site Connect, an error will occur when migrating to version 7.
CON-800	Migration isn't triggered if the user account running the app is not the same as the user account used to install the app.
CON-823	The Colligo Add-In is now registered in the always enable list (COM Add-Ins section).

Known Issues: Colligo Engage 7.1 Update 4 (build 7.1.23)	
Reference	Description
CON-773	When the email decryption feature is enabled and the font is specified as +Body or +Headings in any of the font selection areas of Outlook Options → Mail → Stationary and Fonts , the font information is lost when uploading a decrypted email.
CON-775	<p>Site credentials are missing from the Engage Outlook App after adding a new (never previously added) location from the IE tool bar. Credentials should have been saved when the user provided them to IE, saved them, and then clicked the Connect to Outlook App button under the command bar followed by Add as Favorite.</p> <p>Workarounds:</p> <ul style="list-style-type: none"> • In Outlook, edit the configuration for the site and enter the credentials. • Add the site from within Outlook.

Release 7.1 Update 3 – 18 December 2015

Resolved Issues: Colligo Engage 7.1 Update 3 (build 7.1.17)	
Reference	Description
CON-666 CON-712	Users were not prompted to get rid of the existing PST when migrating from 5.x to 7.x, resulting in two PSTs after the migration.
CON-682	<p>The first time you open the Attachment Manager it loads the list of Folders as displayed in the PST. If a user renames a Folder in the PST, subsequent launches of the Attachment Manager will not display the new name until Outlook has been restarted. (Known Issue in 7.1 Update 2.)</p> <p>Resolved: A restart of Outlook is no longer required.</p>
CON-695	When uploading a batch of new files to a folder, you would sometimes see a message saying that the file conflicted with an earlier version of the file (even though there was no prior version).
CON-697	The Rename Dialog popup will disappear after launch if you are in the Embedded Browser view.
CON-710	Using the DisablePST setting may cause Outlook to crash.

Resolved Issues: Colligo Engage 7.1 Update 3 (build 7.1.17)	
Reference	Description
CON-714	When using the Colligo Attach feature to attach an email file (.eml) from SharePoint, the attached file loses case sensitivity. Special characters were also not handled.
CON-715	The first time you open Attachment Manager it takes you to where you want to go. Subsequent launches re-open Attachment Manager to where you last left it, which may not be what was selected.
CON-716	Attachment Manager Search searches on Author (person who uploaded to SharePoint) and now displays both Author and Sender (instead of just Sender). Additionally, Search now returns 200 results.
CON-717 CON-740	Cached data (including temporary files) is not fully removed from the computer/device when the site is removed from Colligo Engage.
CON-718	The option to hide Metadata fields fails when there is a space in the column name.
CON-748	Clicking on Insert Item or Insert Link when nothing is selected yields an empty popup. Resolved: It is no longer possible to click the Insert option if nothing is selected.

Known Issues: Colligo Engage 7.1 Update 3 (build 7.1.17)	
Reference	Description
CON-671	Meetings cannot be uploaded when dragged from the Calendar view. Workaround: Drag calendar item from the Inbox.
CON-675 *	The first time you open Attachment Manager it loads the list of Favorites as displayed in the PST. If a user renames a Favorite in the PST, subsequent launches of the Attachment Manager will not display the new name until Outlook has been restarted.
CON-685	<code>PSTDisableGrowAllowAuthenticcodeOverrides</code> does not work with 64-bit Outlook. For details, refer to the knowledge base article Colligo Email Manager for Outlook with 64-bit Outlook (https://support.colligo.com/solution/articles/16000009585).
CON-689	In Connected Mode, canceling the drag and drop of an email with multiple attachments may not work as expected. (Files are still listed in the properties editor.)

Known Issues: Colligo Engage 7.1 Update 3 (build 7.1.17)

Reference	Description
CON-696	PSTDisableGrowAllowAuthenticcodeOverrides does not allow overrides when EnableSharePointListEmulation is set.

* This issue has been resolved in a later release.

Release 7.1 Update 2 – 30 September 2015

New in this Release: Colligo Engage 7.1 Update 2 (build 7.1.10)

Reference	Description
TSE-27	Support for drag and drop of calendar items.
TSE-47	When uploading to a Document Set in Connected Mode, the Edit Properties dialog will only display Content Types available within the target Document Set.

Resolved Issues: Colligo Engage 7.1 Update 2 (build 7.1.10)

Reference	Description
TSE-22	French language translations in the Outlook settings dialog can have truncated text.
TSE-28	Document metadata changed on the document properties pane within the document does not get applied to the document.
TSE-31, 38	Locally renamed locations are now more consistent throughout the product.
TSE-41	Support for 2-factor authentication using smart cards and Office 365 authentication.
TSE-45	In Connected Mode, canceling a drag and drop move action will no longer lose the original source item.
CON-664	The MSI property to disable Google Analytics now correctly places the registry key.

Known Issues: Colligo Engage 7.1 Update 2 (build 7.1.10)

Reference	Description
CON-682 *	The first time you open the Attachment Manager it loads the list of Folders as displayed in the PST. If a user renames a Folder in the PST, subsequent launches of the Attachment Manager will not display the new name until Outlook has been restarted.

* This issue has been resolved in a later release.

Release 7.1 Update 1 – 11 May 2015

New in this Release: Colligo Engage 7.1 Update 1 (build 7.1.5)

Reference	Description
CON-407	Within Outlook View, users can copy the SharePoint link of one or several items.
CON-412	Within Outlook View, users can send one or several items as email attachments.
CON-484	Users have a new option when a duplicate is detected in Connected Mode. Users can overwrite the existing file, skip the file, or create a new version. Creating a new version will automatically rename the file by appending a number to the file name.
CON-485	Outlook View will perform individual updates against items when changes have been detected for non-cached locations.
CON-558	Users can directly open the server's current version of a file when working with cached locations through a right-click on the item within the Outlook View.

Resolved Issues: Colligo Engage 7.1 Update 1 (build 7.1.5)

Reference	Description
CON-601	Applying Managed Metadata to xml based office documents (.***x) on upload in Connected Mode causes other Metadata in the file to be lost. (Known Issue in 7.1)
CON-606	Fixed an issue with the persistence of the Upload Progress Window setting after Outlook restarts.
CON-607	Fixed an issue with Open in SharePoint from Outlook View when the user's Windows credentials aren't the same as those used to access SharePoint.

Resolved Issues: Colligo Engage 7.1 Update 1 (build 7.1.5)

Reference	Description
CON-621	Fixed an issue with not splitting attachments from their original emails if the email was originally sent from a non-Outlook email client.

Known Issues: Colligo Engage 7.1 Update 1 (build 7.1.5)

Reference	Description
CON-650	Outlook's DisablePST and DisablePSTGrow policies can prevent Outlook View from displaying files properly.

Release 7.1 – 24 February 2015

New in this Release: Colligo Engage 7.1 (build 7.1.2)

Reference	Description
CON-213	New Uploads button to display the progress of files being uploaded to SharePoint.
CON-247	Added support for the Outlook View for upload only locations in Offline Mode.
CON-354	The upload progress pane can now be controlled through the settings options to only show when there is an error with the upload.
CON-405	The size of the upload progress pane is now remembered for the next Outlook session.
CON-419	Attachments can be split from the email at the point of upload and referenced by an Attachment ID.
CON-450	Multiple selection in the Attachment Manager.
CON-473	Notification when Outlook View can't communicate with the SharePoint server.
CON-551	Added translations for new features (7.0 to latest release).

Resolved Issues: Colligo Engage 7.1 (build 7.1.2)	
Reference	Description
CON-403	Fixed an issue with lookup columns on multiple uploads.
CON-448	Fixed an issue with the Send & File button ignoring the spell check.
CON-449	Fixed an issue with saving emails or attachments to folders with semicolons.
CON-465	Fixed an issue with the Message portion of the Email ribbon disappearing.
CON-474	Fixed an issue with the New Email notification not showing.
CON-537	Flickering edit metadata screen and managed metadata picker when not using type-ahead managed metadata control.
CON-554	Fixed issue with items being removed out of the PST.

Known Issues: Colligo Engage 7.1 (build 7.1.2)	
Reference	Description
CON-578	es-es locale is not being picked up properly by the registry key override.
CON-579	In-line Reply , Forward , and Reply All do not do anything on an email file when in Outlook View.
CON-601 *	Applying Managed Metadata to xml based office documents on upload in Connected Mode causes other metadata in the file to be lost.

* This issue has been resolved in a later release.

Release 7.0 – 1 December 2014

Resolved Issues: Colligo Engage 7.0 (build 7.0.13)	
Reference	Description
CON-455	Launching Outlook sometimes caused an error that prevented the user from using functionality.

Release 7.0 – 15 October 2014

New in this Release: Colligo Engage 7.0 (build 7.0)	
Reference	Description
CON-263	Rebranding of Colligo Email Manager and Colligo Briefcase to Colligo Engage. Applications now display the new Colligo Engage branding and logo.
CON-22	In the Outlook View of the Engage Outlook App, items are displayed in the list with Subject being the filename, and From being the uploader of the document to SharePoint.
CON-26	In the Engage Outlook App there is a new view "Outlook View" that is available in the settings. Enabling this mode lets you view the contents of the SharePoint folder as an Email folder. Selecting an item in this mode previews the item using the Outlook preview.
CON-28	In the Engage Outlook App (Offline Mode), the user can now set a Site to be a Folder. In doing this the current Document Libraries within the SharePoint Site will be added. Any new Document Libraries added after the Site has been added will need to be added individually.
CON-36	The Engage Outlook App (Connected Mode) is now supported for use in a Citrix XenApp environment. For details regarding configuration and licensing in this environment, contact Colligo Sales at https://www.colligo.com/contact-sales .
CON-48	After the start-up of Outlook, the Engage Outlook App builds out the folder structure allowing the start-up of Outlook to be within the allowed time for Outlook 2013. Progress of the build out of the folder structure is displayed in the footer of Outlook and once complete the progress bar will disappear automatically.
CON-54	A user uploading more than 50 items at a time will be blocked from performing the operation. This number can be altered through an Administrator setting.

New in this Release: Colligo Engage 7.0 (build 7.0)	
Reference	Description
CON-55	A user uploading more than 10 items at a time will be warned that it may take some time to perform the upload. This number can be altered through an Administrator setting.
CON-57	When the Engage Outlook App is installed in Connected Mode and a user uploads emails to SharePoint, the progress of the upload is now displayed in a pane within Outlook so that the user can continue to interact with Outlook. If the user chooses to close the progress window it will re-appear if there is an issue with the upload. While the upload is in progress, the user can't upload any more items until the current upload is complete.
CON-69	There is a new option in the Engage Outlook App to enable you to rename the folders that are available for you to drag and drop to. To do this right-click on a Favorite or Folder and select the option to rename. This will bring up options for you to select, or you can specify your own name. If you choose to select a name you will be given the option to set this for all un-modified locations.
CON-125	The Engage Windows App now has an option to clear the filter on columns.
CON-126	When selecting to apply a filter on columns in the Engage Windows App, the filter now stays available to be able to select more than one filter.
CON-191	The Metadata prompt now supports multilingual SharePoint TermSets.
CON-346	Support for authentication for ADFS 3.0 Single Sign-On.
CON-349	The installation now asks you if you have a Colligo Engage account. Selecting yes will prompt you for a username and password to connect to Colligo Console.

Known Issues: Colligo Engage 7.0 (build 7.0)	
Reference	Description
CON-268	The cancel button on the Engage Outlook App for the build out of folders does not cancel the operation successfully.
CON-372	Windows Identity Framework is not identified as pre-requisite software during installation. If required, you will need to install it manually before the installation of Colligo Engage.

Known Issues: Colligo Engage 7.0 (build 7.0)	
Reference	Description
CON-379	When using the Engage Outlook App in Outlook View you may get multiple message boxes asking "Do you want to save changes?" This message box can be canceled out of with no effect on items within SharePoint or the local cache.
CON-385	When using the Engage Outlook App in Outlook View the focus of the mouse may not be accurate. This may result in actions on the mouse scroll wheel being directed at locations that are not in focus, such as the ribbon.
CON-386	<p>When a user selects to connect to the Engage Outlook App in Internet Explorer the Site gets added to Colligo Engage, but any Favorites or Folders do not get added.</p> <p>Workaround: To add Favorites or Folders use the Engage Outlook App configuration options.</p>
